

**Aker Stord AS**

TO WHOM IT MAY CONCERN

Mostostal Pomorze SA has performed prefabrication of main steel and outfitting steel sections for the GJØA SEMI EPCH Project.

The work was performed from November 2007 to May 2009, and consisted of engineering and prefabrication of approximately 3200 Tons of steel sections and prefabrication of 500 Tons of grillage.

The quality of work was performed to our full satisfaction and in accordance to schedule.

Sincerely

For Aker Stord AS

A handwritten signature in blue ink, appearing to read 'Lars Eide', is written over a dotted line. The signature is fluid and cursive.
