

To Whom It May Concern

Szczecin, 01.03.2013.

LETTER OF REFERENCE

We would like to confirm that MOSTOSTAL POMORZE SA performed the following works for London Array Offshore Wind Farm:

- Fabrication of steel cages (~200 tons of steel structures, 220 tons of anodes);
- Fabrication of 47 pcs. of grout skirts (~1000 tons of cans + 200 tons of flanges);
- Fabrication of I and J tubes (TP 1.1, TP2.1, TP4.1, TP4.2 ~ 900 tons).

Project was executed between: 2010 - 2011

During this project MOSTOSTAL POMORZE has proved to be very experienced and professional in executing prefabrication of different, not typical steel items. All the works were completed on planned schedule.

We consider the overall result of our co-operation as very positive and we can recommend MOSTOSTAL POMORZE as a reliable partner for steel structures prefabrication.
