## REFERENCE LETTER

Hereby we are pleased to confirm that company MOSTOSTAL POMORZE SA from February to May 2014 fabricated for us steel structures of RTG Rubber Tyre Gantry Cranes for BMT Project (2 sets).

Scope of works included fabrication, assembly and anticorrosion protection of:

- Main beams with rails,
- Columns,
- Light steel structures (service platforms, supports, holders, cable groves, etc.).

Total weight of fabricated steel structures was approximately 120 Mg.

MOSTOSTAL POMORZE demonstrated high standards and good quality of works, flexibility and quick reaction to any change in our Purchase Orders. The scope of works was completed within the planned schedule.

We have very positive opinion on professional experience of MOSTOSTAL POMORZE's staff and constructive attitude to solve problems that appeared during project execution.

Yours sincerely,

Jari Hellsten, Project Quality Engineer, Kalmar Project Delivery, Cargotec Finland Oy
